
Create Course Groups (UT Manage Groups)

Blackboard **GROUPS** are flexible, collaborative areas that can be used for everything from group work to managing tutorials. Group members can easily facilitate study groups, communicate with their peers, instructor or TA, and submit group assignments.

Groups are created using the **UT MANAGE GROUPS** tool, which allows for quick creation of both simple and advanced groups, with numerous enrollment options.

Note: [Student Preview](#) [1] may not fully display content for UT Manage Groups.

Below are some examples of how you might use UT Manage Groups. However many of the options available can be combined to meet different needs, please contact portal.help@utoronto.ca [2] to find out more.
